

Fish Augmentation Plan

Motion 06-006

On August 23, 2006, based on the recommendation from the Technical Work Group (PDD-06-005), the Steering Committee acknowledged the Final Fish Augmentation Plan. Both the California Department of Fish and Game and the U.S. Fish and Wildlife Service reviewed the plan and both support its implementation (see letters as part of PDD-06-005). Moved by Bill Werner, seconded by Phil Lehr, and adopted by consensus.
